

## PTZ Tracking

PTZ tracking is a useful tool for customers to integrate DVRs/NVRs with PTZ cameras further by enabling PTZ cameras to track moving objects instantly in specific areas.

### features

- self-directed and vision-guided tracking of a moving object
- tracks moving objects with a single PTZ camera
- includes the option to return to the preset position after tracking
- stops PTZ tracking automatically through manual control override
- goes back to PTZ tracking mode to prevent idling
- fully integrated with IWH/SA/NV/XR series
