

## Remote iMatrix

Remote iMatrix is a free of charge remote tool which provides users a platform to pre-configure 128 monitor views and display in a 4-monitor environment, with the ability to create a TV-wall environment for central management with CM3000 Gold.

### features

Each Remote iMatrix server supports up to 4 monitors for display and is able to work with a CM3000 Gold server to build a TV-wall environment with unlimited monitor display. Through the free of charge surveillance tool, users can pre-configure up to 128 pre-defined monitor views in one system, monitor up to 320 live channels at the same time, and display in a 4-monitor environment. If the Remote iMatrix is integrated with CM3000 Gold as a dispatch server, it can share the system loading of a CM3000 Gold server. The installation and operation of Remote iMatrix are both easy and flexible. Users are able to install Remote iMatrix on their computers to remotely view live videos and playback video through Remote iMatrix anywhere, anytime.

### high performance - construct TV-Wall and share CPU loading

- free of charge remote surveillance tool
- supports 1024 x 768, 1280 x 1024, 1200 x 800, 1440 x 900, 1680 x 1050, 1920 x 1080, 1920 x 1200 resolutions
- live monitoring of up to 320 channels at the same time
- each Remote iMatrix server supports up to 4-monitor display and is able to work with a CM3000 Gold server to build a TV-wall environment for unlimited display
- each iMatrix can connect up to 16 remote DVR/NVR clients and 256 user accounts

### flexible monitoring and live playback

- configure up to 128 pre-defined monitor views in one system
- includes the option to insert different objects into each configured monitor view, including video, image, & alarm spot

- instantly playback and check a video for abnormalities, while maintaining the live video feed on the other channels
