

iBBViewer

The iBBViewer provides users remote access to monitor videos from AVer DVRs/NVRs via a BlackBerry mobile. Users can remotely view live videos anytime and anywhere on a BlackBerry mobile, and their privacy is highly protected through an authorization mechanism. The account information and corresponding IP address will be saved automatically, too.

features

- remote live monitoring anytime and anywhere
- privacy is highly protected by authorization mechanism
- single channel live display
- remote PTZ control
- connection information is saved automatically
- compatible with all AVer DVRs/NVRs
